

Modifying User Setting to Edit Tank Contents in Production Wizard™

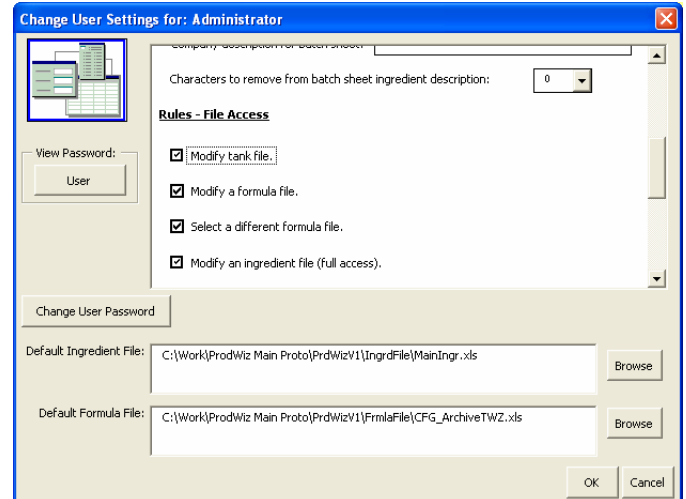

Select **Edit User Settings** from the **Production Wizard Administrator** menu.

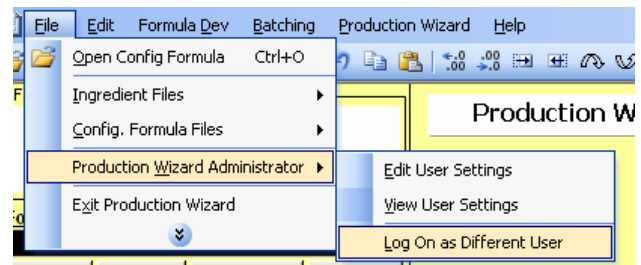

The **User Settings** window appears. Select **Administrator** and Press the **View/Change User Settings** button.

The **Change User Settings** window appears. Scroll down until you find the **Modify Tank File** option. Uncheck then check it. Next, continue to press the **OK** button until all the windows are closed.

To use the new settings, log on as the administrator again. Select **Log On as Different User** from the **Production Wizard Administrator** menu.

Select **Administrator** and Press the **OK** button.
